Weekly asymptomatic testing is an additional safety measure to prevent the possible spread of COVID-19. Without symptoms, many people with COVID-19 infections aren’t even aware they are carriers of the virus. As a result, they may not be taking the necessary precautions to isolate themselves and protect others.

- No out of pocket cost for anyone taking the test
- Pre-Registration is required (see links / QR codes below)
- Self-administered shallow nasal swab
- Results within 3 days

**NOTE:** This is NOT for anyone with symptoms, please see these locations for anyone testing WITH symptoms:

- [Sonoma County Testing Locations](#)

### Drop-In Non-Symptom Services
(Pre-registration required)

**When:**
Monday - Thursday  
2:30pm - 5:00pm
